PRESS RELEASE

BML gives advice to customers planning to travel abroad

- **Using your credit card is a better alternative than carrying cash**
- **Check your available credit and daily limit before you travel**

Bank of Maldives would like to advise customers that using our Debit and Credit Cards is a better, safer and more convenient solution than carrying cash while travelling abroad. The Bank issues VISA Debit, American Express and VISA Credit Cards which can be used for making transactions abroad at millions of outlets and ATMs.

BML has found that some customers become frustrated if their debit or credit card appears to have been declined when abroad. Cards will almost always be accepted if the amount being transacted is within the cardholder's limit. Currently VISA Debit Card holders can withdraw up to USD 200 daily while Point-of-Sale transactions have a daily limit of USD 400. Credit card holders are advised to check their available credit and daily limits before travelling abroad.

If customers require any further clarifications or wish to resolve a card related issue while travelling abroad, we request you to contact one of our Call Centre agents on +960 3330200. Alternatively if you choose to, you can send an SMS to +960 7990200 or +960 9990200 and one of our agents will contact you immediately.
